Willing to relocate to Germany
Eligible for German Blue Card

Frontend Developer with hands-on experience building and refactoring large-scale web applications using React, Next.js, and TypeScript. Skilled in creating modular, maintainable code with modern architectures (FSD, Server Actions) and intuitive UI/UX design. Re-architected a marketplace to FSD structure, improving scalability, maintainability, and onboarding speed. DAAD scholarship with a one-year study stay in Kempten, Germany, providing strong familiarity with German culture, communication, and working style. Strong collaborator in cross-functional Agile teams.

SKILLS

- Frontend:** Next.js, React, FSD Architecture, Server Actions, TypeScript, Tanstack Query/Form/Router, Redux, Zustand, JavaScript (ES6+), React Hook Form, Recharts, Internationalization (i18next), Tailwind, Material UI, Canvas API, SEO optimization, Semantic HTML, HTML, CSS/SCSS.
- Backend & API:** Node.js, NestJS, GraphQL, RESTful API, commercetools, OpenCart, Joomla
- DevOps & Tooling:** Docker, CI/CD, Git, GitHub, Webpack, Vite, Vitest, Vercel, Netlify
- Soft Skills:** Cross-Functional Collaboration in Agile (Kanban), Strong Intercultural Communication, Adaptability

LANGUAGES

English - C1 (advanced) | German - C1 (Goethe-Zertifikat) | Russian - C2 (native)

EXPERIENCE

AcePlace
Frontend Developer (React / TypeScript)

05/2024 – Present

Project 1: AcePlace – Social Marketplace Platform:

- Refactoring and extending a large-scale marketplace using React, Next.js, TypeScript, and FSD architecture.
- Migrating a legacy OOP-based frontend to a modular, type-safe architecture, improving scalability and onboarding speed.
- Building complex business modules including registration flows, company profiles, analytics dashboards, and order & product management.
- Simplifying multi-layer API interactions using Next.js Server Actions, reducing debugging time by 2x.
- Collaborating in a cross-functional Agile (Kanban) team with backend developers, QA, designers, and a team lead.

Project 2: GostAssistent.ru – Technical Standards & Legal Documentation Platform

- Adapting the frontend to a new backend authentication flow, including centralized auth logic and secure server-side execution.
- Refactoring 100+ API routes, introducing a unified authentication and request-handling layer.
- Redesigning application architecture to initiate client-side data requests while doing secure execution on the server.
- Implementing a smart search system using MiniSearch, with custom stemming, server-side index building, and multiple search modes.
- Developing internal admin panels for LLM testing and access token management; improved SEO via redirect handling.

Tech Stack: React, Next.js, TypeScript, Redux, Zustand, React Hook Form, Motion, Tanstack, MiniSearch

Key Projects & Achievements:

- **GraphQL Query Editor:** Engineered a sophisticated online editor with user authentication, dynamic API selection, and real-time visualization of queries and responses. Tech Stack: React, Redux, Material UI, Vitest
- **E-Commerce Application:** Developed a scalable storefront integrated with a cloud-based commercetools backend. Tech Stack: TypeScript, React
- **Interactive Billiard Game:** Implemented real-time physics and dynamic rendering using HTML Canvas API and TypeScript.

fontan-online.ru

01/2013 – 05/2024

Individual Entrepreneur**IT & Development Responsibilities:**

- **Platform Rebuild:** Built the online store from scratch on Joomla/Virtuemart and later rebuilt it on **OpenCart**.
- **API Integration:** Successfully integrated third-party services, including **payment gateways** (Yookassa), **logistics APIs** (SDEK), and external marketplaces (Yandex Market).
- **Catalog Management:** bulk product upload and day-to-day content management for a catalog exceeding **2,000 items**.
- **Frontend Customization:** Personally handled UI/UX improvements using HTML and CSS to optimize the customer journey and SEO structure.

Business Operations:

- Directly managed end-to-end business workflows: procurement, financial planning, digital marketing, and client consultations.

PREVIOUS EXPERIENCE

Hydroplastics — Co-founder, self-employed, 01/2009 – 01/2013: Co-ran a fountain construction and rental business. Built and maintained the company website (Joomla, HTML/CSS) with a project portfolio and rental catalogue, which later grew into the fontan-online.ru online store.

OSKO, Stiebel Eltron (Wholesale) — Sales Engineer / Head of Sales, 2000 – 2008: Represented German brands such as Stiebel Eltron, OASE, Grundfos, and Buderus on the Russian market: B2B sales, client relations, and interpreting for German partners. Organized business trips and trade fair visits to Germany.

EDUCATION

Moscow Power Engineering Institute

Master's Degree in Electrical Engineering (ZAB-evaluated as equivalent to a German Master's degree (Master-Ebene))

FH Kempten (now Hochschule Kempten), Germany

DAAD 10-month scholarship: Conducted research in the Laboratory for Electrical Energy Systems (Labor für Elektrische Energiesysteme)

CERTIFICATIONS & COURSES

THE ROLLING SCOPES SCHOOL (providing International open-source training program for developers with 40,000+ alumni worldwide):

- NodeJS 2025
- React 2023
- JAVASCRIPT/Front-end 2023

HOBBIES

Calisthenics, Language learning, Woodworking
